PROFILE SUMMARY

Computer Science graduate specializing in Cloud Infrastructure, DevOps automation, and CI/CD pipelines. Leverages expertise in AWS, Python, and Agile methodologies to architect and deploy secure, highly available cloud-native applications. Proven success at Cognizant in optimizing enterprise automation frameworks to accelerate deployment workflows, alongside leading 45+ member cross-functional teams. Combines technical rigor in serverless provisioning and infrastructure scaling with strong stakeholder communication to translate complex business requirements into resilient, automated solutions.

EDUCATION

- **University of Liverpool** — *Master of Science (M.Sc.) in Computer Science*
September 2024 – September 2025 | Grade: 68.19% (2:1)
 - **Modules:** Efficient Algorithms, Database Systems, Computational Intelligence, Data Mining & Visualization, Web Programming, Web Mapping & Geo-visualization
- **Narula Institute of Technology** — *Bachelor of Technology in Electronics and Instrumentation Engineering*
July 2018 – June 2022 | 83%

SKILLS

- **Languages:** Python, Java, SQL, JavaScript, PHP, C
- **Frontend Development:** React.js, Tailwind CSS (v4), HTML5, CSS3, Bootstrap, Vite
- **Backend & Databases:** Laravel, MySQL, SQLite, RDBMS
- **Cloud & DevOps:** AWS (S3, CloudFront, IAM), AWS CLI, CI/CD pipelines, Git, Agile Methodology
- **Testing & AI Tools:** Selenium, OpenCV, TensorFlow

PROFESSIONAL EXPERIENCE

- **Quality Engineering & Assurance, Cognizant Technology Solutions**, January 2022 – December 2022
- Spearheaded an Agile project, supervising a team of 45 members, ensuring seamless collaboration.
- Gained Java, Selenium, and SQL expertise to enhance testing frameworks and automation workflows.
- Delivered two major automation projects: Flipkart Automation, streamlining shopping with automated login, cart, purchase, and checkout; and Zig Wheels Automation, improving bike and car data categorization using Excel-based retrieval.

PART-TIME

- **Casual Safety Hosts, Liverpool Football Club**, October 2024 – Present
- Managed crowd control and emergency response at Liverpool Football Club, guaranteeing the safety and well-being of guests and staff.
- Demonstrated strong interpersonal skills, contributing to a secure and welcoming environment.

ACADEMIC PROJECTS

- **Cloud-Native Interactive Portfolio** | December 2025 – February 2026
- **Architected and developed** a responsive Single Page Application (SPA) using React and Tailwind CSS, featuring custom keyframe animations and glassmorphism UI.
- **Engineered a serverless deployment pipeline** utilizing the AWS CLI to automatically build, minify, and sync production assets to an Amazon S3 bucket.
- **Configured robust cloud infrastructure**, managing AWS IAM bucket policies for secure public access and setting up S3 Static Website Hosting.
- **Implemented AWS CloudFront CDN** to serve the application globally from edge locations, ensuring sub-second load times and enforcing HTTPS security.
- **Book Exchange Web App — Full-Stack Developer**, June 2025 – Present
- Built and deployed a full-stack, community-focused web app using **Laravel** (RESTful API) and **React + Tailwind CSS** for a responsive, component-based frontend.
- Integrated **Tesseract OCR** (via pyTesseract) to auto-extract book titles/authors from cover images, reducing manual entry time.

- Designed and implemented a **MySQL** relational schema with secure, validated **Eloquent ORM** API endpoints for user auth, inventories, and exchange proposals.
- Developed a **credit-based valuation & exchange system** enabling fair trades, forming the core business logic.
- **Identification of Relevant Literature for Research**, September 2024 – December 2024
- Researched GloTa, a hybrid model integrating GloVe and RoBERTa, achieving a 9.43% efficiency improvement in academic paper recommendations.
- Proposed innovative pathways to optimize literature search systems, contributing to global research advancements.
- **Thermal Scanning and Face Mask Detection**, August 2020 – July 2021
- Built a system combining thermal scanning and mask detection using Python, OpenCV, and TensorFlow, achieving 95% accuracy.
- Published findings in the International Journal for Research in Applied Science and Engineering Technology (IJRASET).

PERSONAL PROJECTS

- **TextUtils**, June 2023 | ([GitHub](#))
- Created a self-paced learning project that improved proficiency in JavaScript, CSS, and ReactJS, completing over 50 hours of coursework and practical applications.
- Concepts of JavaScript, CSS, Bootstrap, ReactJS.
- **Myntra Clone**, July 2024 | ([GitHub](#))
- Built a UI replica of Myntra using HTML5 and CSS3, focusing on layout structuring, responsive design, and styling.
- Implemented CSS Flexbox and Grid to create a clean and modern user interface.
- Concepts of HTML, CSS, Flexbox, Grid.

ACADEMIC ACHIEVEMENTS

- Finalist, IIC National Innovation Contest | Qualified for Smart India Hackathon.
- Awarded "Best Hardware Project" for innovative solutions | Narula Institute of Technology.
- Recognized as "Best Robotic Workshop Instructor" | Narula Institute of Technology.

EXTRACURRICULAR ACTIVITIES & COMMUNITY SERVICE

- **Co-Founder & Team Lead | TechACTSS**
- Developed pandemic-assistance projects and spearheaded social media campaigns.
- **Robotics Workshop Organizer**
- Conducted a successful workshop attracting over 100 participants during departmental events.

CERTIFICATIONS

- Advanced Programming in Python – Coursera
- Java for Automation Testing – Udemy
- Web Development Bootcamp – freeCodeCamp
- Career Essentials in Software Development – Microsoft & LinkedIn
- Introduction to Career Skills in Software Development – LinkedIn
