

ANIKET CHAKRABORTY

Cloud Engineer • AWS Certified Solutions Architect – Associate • Right to work in the UK (Graduate visa)
Liverpool, UK • +44 7587 678983 • aniket07chakraborty@gmail.com • LinkedIn • GitHub • Portfolio

AWS-certified Cloud Engineer with an MSc in Computer Science and hands-on experience across AWS, Terraform and Kubernetes. At Cognizant I cut CI regression runtime by 74% and reduced production defect escapes by 38% by automating quality gates and parallelising test execution. Since then I have designed and deployed several end-to-end AWS and Kubernetes projects using Infrastructure as Code, GitOps and CI/CD, with monitoring, high availability and least-privilege security built in. Strong in Python, Bash, SQL and Linux, and looking for a first Cloud, DevOps or Platform Engineering role in the UK.

TECHNICAL SKILLS

- ♦ **Cloud & Infrastructure:** AWS (EC2, Lambda, API Gateway, ALB, Auto Scaling, S3, DynamoDB, RDS, VPC, IAM, CloudWatch, EventBridge, SQS, SNS), Terraform, AWS CDK, CloudFormation
- ♦ **Networking:** VPC design, public/private subnets, route tables, security groups, DNS, Route 53, TCP/IP, Application Load Balancer, NAT Gateway
- ♦ **Containers & Orchestration:** Docker, Kubernetes (EKS), Helm, ArgoCD, microservices
- ♦ **CI/CD & Automation:** GitHub Actions, Jenkins, Ansible, GitOps, Infrastructure as Code, automation
- ♦ **Programming & Scripting:** Python, Bash, SQL, Node.js, REST API design
- ♦ **Monitoring & Observability:** CloudWatch, Prometheus, Grafana, metric alerting, incident response, troubleshooting
- ♦ **Security:** Least-privilege IAM, Kubernetes RBAC, Cognito (JWT/OAuth2), TLS/HTTPS, encryption at rest
- ♦ **Operating Systems & Practices:** Linux (Ubuntu, Amazon Linux), Agile/Scrum, cost optimisation
- ♦ **AI on AWS:** Amazon Bedrock, Amazon Comprehend, Amazon Textract

EXPERIENCE

QUALITY ENGINEERING & AUTOMATION ANALYST

Jan 2022 – Dec 2022

Cognizant Technology Solutions

Kolkata, India

- ♦ Cut CI regression runtime by 74% (3.5 hours to 55 minutes) by parallelising test execution across a Kubernetes environment and optimising Jenkins agent pools, directly raising deployment frequency for the programme.
- ♦ Reduced production defect escapes by 38% by integrating automated quality gates and code-coverage thresholds into Jenkins CI/CD pipelines, improving release safety across the team.
- ♦ Maintained 98% on-time release delivery across a large Agile programme by owning defect prioritisation, incident triage, troubleshooting and root-cause analysis for pipeline and environment failures.
- ♦ Built a shared Java utility library adopted across 6 sub-teams, cutting script-development time by 50%; centralised a SQL test-data repository spanning 200+ automated cases, eliminating 43% of data-related failures.

INDEPENDENT CLOUD ENGINEERING PROJECTS

Jan 2023 – Aug 2024

Self-directed

Remote

- ♦ Designed and deployed four end-to-end AWS and Kubernetes projects (detailed below), provisioning all infrastructure as code with Terraform and AWS CDK and automating build-test-deploy with GitHub Actions and ArgoCD, with no manual deployment steps.
- ♦ Set up CloudWatch, Prometheus and Grafana monitoring with metric-based alerting on latency and error rates, and applied least-privilege IAM, Kubernetes RBAC and Cognito JWT authentication across all environments.
- ♦ Built a resilient, multi-AZ VPC architecture with Application Load Balancer, Auto Scaling and security-group-based traffic isolation, demonstrating high availability, networking and cost-aware infrastructure design.

ADDITIONAL EXPERIENCE

RETAIL TRAINEE MANAGER (promoted from Technical Operations Assistant)

Jul 2025 – Present

Sainsbury's

Liverpool, UK

- ♦ Promoted into Sainsbury's structured Retail Trainee Manager Programme after four months, taking on team leadership, operational ownership and accountability for safe, efficient store operations across Online and Nightshift functions.
- ♦ Previously handled first-line operational troubleshooting across checkout, fulfilment and stock systems, logging recurring faults through ticketing to identify patterns and reduce repeat incidents.

EDUCATION

MSc Computer Science (2:1)

University of Liverpool

Sep 2024 – Sep 2025

Liverpool, UK

CERTIFICATIONS

- ◆ AWS Certified Solutions Architect – Associate (AWS)
- ◆ HashiCorp Terraform Associate (in progress)
- ◆ CKA – Certified Kubernetes Administrator (in progress)

CLOUD ENGINEERING PROJECTS

AI-Powered Enterprise Document Analyser

AWS S3 | EventBridge | SQS | Bedrock | Textract | Comprehend | Cognito | DynamoDB

- ◆ Built a fault-tolerant, event-driven pipeline (S3 → EventBridge → SQS) with independent retry at each processing stage, designed for resilience and automated recovery.
- ◆ Integrated Amazon Comprehend to detect and remove PII before storage, with Cognito JWT authentication and attribute-based access control.
- ◆ Used Amazon Textract and Amazon Bedrock for document extraction and generative-AI summarisation.

Multi-AZ VPC with Application Load Balancer and Auto Scaling

AWS VPC | ALB | Auto Scaling | EC2 | Route Tables | CloudWatch | Terraform | GitHub Actions

- ◆ Provisioned a high-availability VPC across two Availability Zones with public and private subnets, an internet-facing Application Load Balancer, and an EC2 Auto Scaling Group, all defined in modular Terraform.
- ◆ Applied security-group-based traffic control so EC2 instances only accept traffic through the ALB, with CloudWatch alarms on CPU utilisation for operational visibility and cost awareness.

GitOps Kubernetes Platform

Terraform | Kubernetes | ArgoCD | Helm | Prometheus | Grafana

- ◆ Provisioned a reproducible multi-node Kubernetes cluster with Terraform, supporting containerised microservices with automated DevOps delivery.
- ◆ Implemented GitOps with ArgoCD as the single source of truth, with namespace-scoped RBAC and network policies.
- ◆ Configured Prometheus and Grafana dashboards with alerting on deployment and infrastructure anomalies.

Serverless Cloud Task Manager

AWS Lambda | API Gateway | Terraform | GitHub Actions | CloudWatch | Docker

- ◆ Designed a serverless REST API backend (Lambda + API Gateway) with least-privilege IAM scoped per component.
- ◆ Built a fully automated GitHub Actions CI/CD pipeline (build, test, deploy) with CloudWatch alarms for latency spikes and application errors.

ACHIEVEMENTS

Finalist, IIC National Innovation Contest • Qualified, Smart India Hackathon • Best Hardware Project Award, Narula Institute of Technology
